The image shows the exterior of a building with a light-colored, rectangular stone or concrete block facade. A dark, solid-colored door is centered, set within a recessed rectangular frame. To the left of the door, the words "EMBASSY OF" and "BOTTNARYD" are mounted on the wall in large, yellow, three-dimensional block letters. Below the letters, a small, square, gold-colored electronic device with a keypad is mounted. Above the door, two black, adjustable spotlights are mounted on the wall, casting shadows. The door has a silver handle and a small circular peephole. Three wide, dark stone steps lead up to the door. The ground in front of the steps is paved with light-colored rectangular stones.

EMBASSY OF BOTTNARYD

*RC4 is a fireproof industrial door and a door
when you require a higher resistance class.*

How should your door look?

There are many possibilities to influence the appearance of the door.

The frame and door leaf can be delivered in any RAL color.

We can also supply the door leaf with PVC foil.
