Newsletter

FROM MOMEK AB - THE SWEDISH STEEL DOOR SPECIALIST

DESPITE OF THE COVID-19 VIRUS - MOMEK IS OPEN FOR BUSINESS AS USUAL

I write this newsletter to inform you that Momec, despite of the Covid-19 virus, is still producing our high-quality marine doors and hatches at the same production level as before.

The main reason for this is that the Swedish Government has chosen a method based on individual responsibility instead of coercive measures, to fight spreading of the virus. In our company contingency plan, we have taken all actions recommended by our authorities to protect our employees, suppliers and customers. Rest assure that we take the situation very seriously and that we're doing our part to prevent spreading.

One positive consequence of the chosen method in Sweden is that our factory is open as usual in contrast to many of our colleagues and competitors in other countries.

As a result, we have noticed an increasing amount of inquiries from both old and new customers. This is of course very pleasing for us - despite the unfortunate circumstances.

I like to underline that we sympathize very strongly with all the businesses that have been forced to close or reduce production due to circumstances beyond their control and we sincerely hope that everything soon returns to normal.

But until then, don't hesitate to contact us - we are open for business as usual.

Best regards,

Magnus Gilborne
Managing Director
